

# PUBLIC HEALTH REPORTS.

## UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

### *Reports from San Francisco, Cal.—Status of plague—Plague-prevention work.*

Passed Assistant Surgeon Blue reports:

December 18. One new case of plague was confirmed by bacteriological examination to-day—a man who died at the almshouse December 16. Total bacteriologically confirmed cases of plague to date, 116; cases clinically verified, 13; total deaths from plague to date, 71.

December 23. Two new cases to-day, one a Frenchman in the almshouse, the other a Mexican; both cases confirmed by bacteriological examination. Total cases of plague bacteriologically confirmed to date, 118; cases clinically verified, 17; deaths, 71.

Doctor Blue further reports plague-prevention work at San Francisco, Oakland, Point Richmond, and Emeryville, Cal., carried out during the week ended December 14:

#### SAN FRANCISCO, CAL.

Sick inspected.....	54
Plague case found.....	1
Suspicious.....	4
Negative.....	49
Dead inspected.....	97
Plague among dead inspected.....	1
Premises inspected.....	7, 201
Houses disinfected.....	80
Houses destroyed.....	13
Nuisances abated.....	428
Rats found dead.....	288
Rats trapped.....	1, 980
Bounty rats received.....	1, 660
Poisons placed.....	402, 545
Rats examined bacteriologically.....	1, 049
Rats infected with bacillus pestis.....	12
Contacts inspected.....	39
Blocks covered with Danysz's virus.....	61

## OAKLAND, CAL.

Sick inspected.....	311
Dead inspected.....	34
Premises inspected.....	2,757
Houses disinfected.....	18
Houses destroyed.....	1
Nuisances abated.....	299
Rats found dead.....	187
Rats trapped.....	2,598
Bounty rats received.....	175
Rats examined bacteriologically.....	18
Poisons placed.....	38,961
Notices served.....	65
Ships inspected.....	36
Ships fumigated.....	7

## POINT RICHMOND, CAL.

Sick inspected.....	2
Premises inspected.....	255
Houses disinfected.....	1
Nuisances abated.....	39
Rats found dead.....	153
Rats trapped.....	172
Poisons placed.....	8,400

## EMERYVILLE, CAL.

Premises inspected.....	78
Rats found dead.....	37
Rats trapped.....	125
Poisons placed.....	2,857

*Outgoing quarantine transactions.*

Week ended December 7. Seventy-three vessels were fumigated and certified to during the week, and 39 vessels previously fumigated were certified to. Of the vessels fumigated during the week 8 were tank ships, fumigated at the hulk.

*Report from Los Angeles, Cal.—Summary of work of sanitation and rat destruction.*

Surgeon Brooks reports, December 9:

Summary of the work of sanitation and rat destruction performed in this city during the period from October 25 to November 30:

Number of medical inspectors, 9; sanitary inspectors, 18; assistant sanitary inspectors, 33 to 79; laborers, 81 to 138; teams, 16 to 47; total number of places inspected, 70,460; vacant places cleaned, 3,567; occupied places cleaned, 17,449; alleys cleaned, 6; loads hauled to the dump, 3,748; loads burned, 2,492; places where poison was used, 7,267; traps used, 456 to 803; rats caught, 9,292; buildings destroyed, 2.

This work was instituted for a month's trial, and is now at an end, though a continuation of the work of rat destruction in some form is under consideration.

*Report from Seattle, Wash.—Plague-prevention work.*

Passed Assistant Surgeon Cofer reports, December 7 and 14:  
Week ended December 7:

Sick inspected.....	1
City blocks inspected and reported upon.....	378
Nuisances abated.....	260
Cubic yards of rubbish burned.....	315
Cubic yards of rubbish removed.....	253
Rats delivered and cremated.....	2, 366
Rats examined bacteriologically.....	735
Rats proved infected with plague.....	2
Vessels disinfected.....	6

Week ended December 14:

Sick inspected.....	1
City blocks inspected and reported upon.....	894
Nuisances abated.....	239
Cubic yards of rubbish burned.....	247
Cubic yards of rubbish removed.....	270
Rats delivered and cremated.....	1, 925
Rats examined bacteriologically.....	1, 150
Pieces of poison placed.....	73, 000
Vessels disinfected.....	5

The last rat proved infected with plague was found November 8, 1907. To that date, 3 plague-infected rats had been found.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES  
OF THE UNITED STATES—UNTABULATED.

CALIFORNIA—*Sacramento*.—Month of September, 1907. Estimated population, 40,000. Total number of deaths, 50, including diphtheria 1, enteric fever 1, and 9 from tuberculosis. Cases: Diphtheria 5, enteric fever 2, and scarlet fever 1.

*San Diego*.—Month of November, 1907. Estimated population, 40,000. Total number of deaths, 70, including diphtheria 1, and 9 from tuberculosis. Cases: Diphtheria 8, and scarlet fever 1.

Month of October, 1907. Reports to the State board of health from 166 towns having an aggregate population of 1,018,015 show as follows: Total number of deaths from all causes, 1,235, including diphtheria 17, enteric fever 24, measles 1, scarlet fever 3, whooping cough 3, and 146 from phthisis pulmonalis. Cases: Diphtheria, 193 in 46 towns; enteric fever, 95 in 36 towns; measles, 109 in 16 towns; scarlet fever, 114 in 30 towns; whooping cough, 45 in 9 towns; phthisis pulmonalis, 38 in 19 towns.

CONNECTICUT—*Bridgeport*.—Month of November, 1907. Estimated population, 95,000. Total number of deaths, 115, including diphtheria 1, enteric fever 1, measles 1, and 19 from tuberculosis. Cases: Diphtheria 18, enteric fever 5, measles 9, scarlet fever 5, whooping cough 3, and phthisis pulmonalis 8.

FLORIDA.—Reports to the State board of health for the week ended December 14, 1907, show as follows: Diphtheria—*Jacksonville*, 2 cases; *St. Augustine*, 2 cases; *Miami* and *Fernandina*, each 1 case. Enteric fever—*Jacksonville*, 2 cases; *Tampa*, 1 case. Tuberculosis—*Jacksonville*, 2 cases; *Miami*, *Palatka*, and *Tampa*, each 1 case.

INDIANA.—Month of October, 1907. Estimated population, 2,648,594. Total number of deaths, 2,701, corresponding to an annual death rate of 11.8 per 1,000 of population, including 35 from diphtheria, 140 from enteric fever, 1 from measles, 6 from scarlet fever, 1 from whooping cough, and 304 from tuberculosis.

Morbidity: Diphtheria, 268 cases in 45 counties; enteric fever, 562 cases in 73 counties; smallpox, 75 cases in 7 counties.

MASSACHUSETTS—Reports from the State board of health for the month of October, 1907, show as follows: Week ended October 5, 1907. Forty-four cities and towns, having an aggregate estimated population of 2,244,461, report 693 deaths, including diphtheria 12, enteric fever 7, measles 1, and 57 from phthisis pulmonalis. Cases: Diphtheria 183, enteric fever 109, measles 25, scarlet fever 115, whooping cough 2, and tuberculosis 100.

Week ended October 12, 1907. Number of localities reporting, 44. Estimated population, 2,245,027. Total number of deaths, 725; diphtheria 15, enteric fever 11, phthisis pulmonalis 50.

Cases: Diphtheria 183, enteric fever 121, measles 23, scarlet fever 97, whooping cough 4, and tuberculosis 99.

Week ended October 19, 1907. Number of localities reporting, 43. Estimated population, 2,234,548. Total number of deaths, 648; diphtheria 6, enteric fever 16, phthisis pulmonalis 55. Cases: Diphtheria 190, enteric fever 116, measles 27, scarlet fever 115, whooping cough 4, and tuberculosis 68.

Week ended October 26, 1907. Number of localities reporting, 44. Estimated population, 2,247,189. Total number of deaths, 710; diphtheria 17, enteric fever 10, phthisis pulmonalis 58. Cases: Diphtheria 202, enteric fever 87, measles 33, scarlet fever 119, smallpox 1, whooping cough 8, and tuberculosis 103.

NEW YORK—*Rome*.—Month of November, 1907. Estimated population, 18,500. Total number of deaths, not reported. Cases: Diphtheria 1, enteric fever 3, and measles 8.

UTAH—*Ogden*.—Month of July, 1907.<sup>a</sup> Estimated population, 25,000. Total number of deaths, 25, including 1 from enteric fever. Cases: Diphtheria 10, measles 1, and scarlet fever 16.

Month of August, 1907. Total number of deaths, 26, including whooping cough 1 and 2 from enteric fever. Cases: Diphtheria 12, enteric fever 13, measles 3, and scarlet fever 2.

<sup>a</sup> Received out of regular order.

Month of September, 1907. Total number of deaths, 30. Cases: Diphtheria 2, enteric fever 10, and scarlet fever 5.

*Salt Lake City.*—Month of November, 1907. Estimated population, 85,000. Total number of deaths from all causes, 107, including diphtheria 3, enteric fever 6, measles 2, scarlet fever 5, and 3 from tuberculosis. Cases: Diphtheria 40, enteric fever 34, measles 351, scarlet fever 26, and phthisis pulmonalis 1.

*Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 28 to December 27, 1907.*

[For reports received from December 28, 1906, to June 28, 1907, see PUBLIC HEALTH REPORTS for June 28, 1907.]

## FOREIGN AND INSULAR.

---

### AFRICA.

*Report from Cape Colony—Examination of rodents at King Williams Town for plague infection.*

The following is received from the medical officer of health for the colony under date of November 11:

Week ended November 9:

No case of plague was discovered during the week.

Twenty-three rats (1 found dead) and 19 mice were examined, of which 1 rat was found to be probably plague-infected.

### ALGERIA.

*No further cases of plague at Oran.*

The following is received from the Department of State, under date of December 19:

A dispatch, dated December 3, 1907, from the American embassy at Paris reports the receipt of advices from the foreign office to the effect that the last case of plague discovered at Oran, Algeria, was on October 31; that the bacteriological examinations made on rats had proven negative for more than ten days; that all measures of disinfection and of destruction of rats had been applied; and that, therefore, the port of Oran need no longer be considered as contaminated.

### AUSTRALIA.

*Examination of rodents for plague infection at Brisbane, Cairns, and Sydney.*

The following information is taken from bulletins issued by the departments of health of Queensland and New South Wales, and forwarded by Consul-General Bray at Melbourne:

### QUEENSLAND.

*Brisbane.*—Week ended October 19. Rodents destroyed, 460; examined, 324; found infected, 0. Week ended October 26. Rodents destroyed, 381; examined, 315; found infected, 0.

*Cairns.*—Week ended October 26. Rats destroyed, 521; examined, 315; found infected, 0. The outbreak of plague at Cairns is extinct.

## NEW SOUTH WALES.

*Sydney*.—Week ended October 19. Rodents destroyed, 1,818; examined, 533; found infected, 0. Week ended October 26. Rodents destroyed, 1,923; examined, 494; found infected, 1.

## BRAZIL.

*Report from Rio de Janeiro—Inspection of vessels—Mortality—Plague, smallpox, and yellow fever.*

Acting Assistant Surgeon Stewart reports, November 18:

Two weeks ended November 17. The following-named vessels for United States ports were inspected and granted bills of health: November 6, the British steamship *Tennyson*, for New York, with a cargo of coffee, 26 cabin and 41 steerage passengers from this port, and no change in the crew personnel; and the British steamship *Crown Prince*, for New Orleans, La., with a cargo of coffee, no passengers, and no change in the crew personnel. November 7, the Brazilian steamship *Acre*, for New York, with a cargo of coffee, 42 cabin and 22 steerage passengers from this port, and with an entire change of crew and officers at this port. November 8, the German steamship *Gertrune*, for New York, with 1 steerage passenger and 2 new members of the ship's personnel, and with a cargo of coffee; and the Norwegian steamship *Sausonberg*, with a cargo of coffee, for New Orleans, La., no passengers, and no change in the crew personnel. November 11, the British steamship *Jeanara*, for Hampton Roads, Virginia, in water ballast, with no change in the crew, and with no passengers. November 12, the American steamship *Olsen and Mahoney*, for San Francisco, Cal., with no passengers, with a cargo of coal, and with three new members of the crew signed on in this port. November 13, the Belgian steamship *Calderon*, for New York, with a cargo of coffee, 4 cabin and 16 steerage passengers, and with no change in the crew; and the Norwegian bark *Ebenezer*, for Boston, Mass., in stone ballast, with no passengers, and with two new members of the crew signed on in this port. November 16, the German steamship *Corrientes*, for New York, with a cargo of coffee, with no passengers, and with no change in the crew.

During the week ended November 3 bubonic plague caused 1 death at Santos.

At Rio de Janeiro during the week ended November 10 there were no cases nor deaths due to yellow fever; 14 cases of smallpox were reported, with 4 deaths, and 5 cases of plague, with 1 death. At the close of the week there were in the hospital of São Sebastião no cases of yellow fever, 22 cases of smallpox, and 16 cases of plague. There were also 2 deaths caused by leprosy at Rio de Janeiro.

At Pernambuco, Brazil, during the two weeks ended September 30, smallpox caused 54 deaths and bubonic plague 3 deaths.

At Rio de Janeiro during the week ended November 17 there were 2 cases of yellow fever reported after a total absence of such disease for eight weeks; 7 cases of plague and 11 cases of smallpox, with 5 deaths. At the close of the week there were in the hospital São Sebastião no cases of yellow fever (both cases of this disease being

treated at their homes), 13 cases of smallpox, and 17 cases of plague. There was 1 death during the week from leprosy.

According to official reports there were 2 deaths in the town of Natividade in the State of São Paulo from plague during the three months ended June 30, 1907.

In the official report for the State of São Paulo for the quarter year ended June 30, 1907, there were no deaths attributed to smallpox or yellow fever throughout the State.

#### CANADA.

#### *Report from Victoria, British Columbia—Measures against tuberculosis.*

Consul Smith reports, December 10:

*Provincial Anti-Tuberculosis Sanitarium.*—British Columbia is the first province in Canada to take active steps to restrict the prevalence of tuberculosis.

A determined effort has been made by the health department and the provincial government of British Columbia to mitigate the prevalence of this disease. During the past year the provincial government has given \$20,000 for the equipment of an antituberculosis sanitarium, the medical societies have contributed \$30,000, the Canadian Pacific Railway Company has donated \$5,000, the governor of British Columbia \$10,000, and various citizens have subscribed \$20,000 additional, making a total of \$85,000 at the command of the directors in charge of the society, which is duly incorporated under the laws of British Columbia.

A site for the sanitarium has been secured on the bank of the Thompson River, 8 miles west from Kamloops, British Columbia, on the line of the Canadian Pacific Railway, 250 miles east of Vancouver, and the place has been given the name of Tranquille. The location is admirably adapted for the purpose, being 11,000 feet above sea level, with an average rainfall of 10 inches and the fall of snow light. Just at this point the Thompson River is nearly 5 miles in width. A large farmhouse, on grounds including 1,500 acres, has been rearranged, with all modern accessories, so as to accommodate 15 patients, in addition to superintendent, nurses, and others. The sanitarium was formally opened November 28, 1907, and out of 70 applicants 15 were admitted and are now undergoing treatment. In selecting the first patients no regard was paid as to whether they could or could not pay. The 15 chosen are those whom the medical board believes the hospital can most greatly benefit.

Over \$50,000 has been invested in the ample grounds and temporary building, but next spring it is expected returns will be received from local societies being organized in all the towns and cities of the Province, when large buildings, capable of accommodating hundreds of consumptive patients, will be erected and equipped with all modern facilities.

## CHINA.

*Report from Chefoo—Plague at Tengchowfu and in vicinity.*

Consul-General Fowler, under date of November 19, reports the existence of bubonic plague at Tengchowfu, near Chefoo.

He further reports that information from Chefoo, dated November 5, states that in the city of Tengchow bubonic plague was prevailing at that time, three or four persons in one family often dying within a few days of one another.

The area of the infected portion of the city is constantly enlarging. Reports indicate that there have already been from 80 to 100 deaths. Sick, dying, and dead are often transported to the country, and it is reported that the disease has broken out in several places in two or three counties. A further report, dated November 14, adds that in one shop a brick bed was torn out and three or four dead rats were found. The mason and one of the employees in the shop were taken sick almost at once, and died within a day or two. Another man was also taken sick.

*Reports from Hongkong—Quarantine measures—Cholera, plague, and smallpox.*

Acting Assistant Surgeon Hough reports:

Week ended October 5. Restrictions enforced by Hongkong against Singapore, as reported on August 17, have been withdrawn.

Of restrictions enforced against Hongkong the following are still enforced:

Madras: Arrivals from Hongkong subject to regulations under the Venice convention at uninfected ports.

Ceylon: Hongkong declared an infected port.

Quarantinable diseases: Plague, 1 case, 1 death; smallpox, 1 case, 1 death.

Seven steamships inspected and granted bills of health.

Week ended October 12. Restrictions enforced by Hongkong remain as reported on October 5.

Restrictions enforced against Hongkong remain as reported on October 5.

Quarantinable disease: Plague, 1 case, 1 death.

Eleven vessels inspected and granted bills of health.

Week ended October 19. Quarantinable disease: Plague, 1 case, 1 death.

Vessels inspected and granted bills of health: Steamships, 7; sailing vessel, 1.

Week ended October 26. Restrictions enforced against Hongkong by Madras as reported on October 5.

Quarantinable diseases: Plague, 1 case, 1 death; cholera, 70 cases, 23 deaths. The cholera cases were all imported from Singapore and quarantined in the harbor.

Nine vessels inspected and granted bills of health.

## CUBA.

*Report from Habana—Inspection and fumigation of vessels—Prophylactic measures carried out at last focus of yellow fever infection.*

Passed Assistant Surgeon Amesse reports, December 16:

*Week ended December 14.*

Vessels inspected and bills of health issued.....	15
Vessels not inspected and bills of health issued.....	5
Members of crews of outgoing vessels inspected.....	660
Members of crews of outgoing vessels not inspected.....	664
Passengers of outgoing vessels inspected.....	415
Passengers of outgoing vessels not inspected.....	17
Persons entering Triscornia for observation prior to sailing.....	96
Persons transferred from Triscornia to vessels.....	142
Certificates of immunity to yellow fever issued.....	29
Vessels fumigated prior to sailing.....	9

During the week no new cases of yellow fever were reported in the Province of Habana.

All prophylactic measures have been taken at the last focus, Calle Sol, this city, these precautions embracing a thorough fumigation, with sulphur for a radius of one block about the infected premises, and a daily inspection of residents.

The case at Remedios was discharged, recovered, December 11, and no further infection has been reported from that district.

*Report from Santiago—Inspection of vessels.*

Acting Assistant Surgeon Wilson reports, December 11:

Week ended December 7. Bills of health issued to 2 vessels bound for the United States. No vessel was fumigated.

No quarantinable disease was reported during the week.

## HAWAII.

*Reports from Honolulu—Examination of rats for plague infection.*

Passed Assistant Surgeon Currie reports that during the week ended November 30, 162 rats were examined bacteriologically at the plague laboratory of the Service at Honolulu. Plague infection was proved in 2 rats sent from Hilo. A vigorous antirat campaign is being carried on at Hilo by board of health.

*Flea and plague.*

Passed Assistant Ramus reports, December 5:

The following is a report on an incident occurring in the Service laboratory here which may have a bearing upon the work of investigation of fleas now being carried on by the Service:

A pig died of plague November 18; the laboratory attendant (disregarding his instructions to apply chloroform to all animals to destroy vermin before taking them from their cages) removed the animal from his cage without this precaution. As he did so, a flea

jumped upon his hand and bit him. He immediately placed his hand in a solution of bichloride of mercury, 1 to 500, drowning the insect and covering the site of the bite with this fluid. After keeping his hand in this solution for a few minutes, he applied a wet bichloride pack. He did not scratch the bite. Examination showed a large wheal at the site of the bite.

An insect, supposed to have been the one that had bitten the attendant, was found in the bichloride solution. It was a very large flea of a pale yellow color, long in proportion to breadth, largest at the ventral end and tapering abruptly to the head. The insect was identical in appearance with fleas sent from San Francisco to the Bureau for identification and probably of the same species. We crushed the insect between two glass slides and several drops of fresh looking blood exuded from it. The blood when fixed and stained showed large numbers of typical plague bacilli. A smear from the blood of the pig showed a marked plague septicemia.

Ten cubic centimeters of Yersin's serum were administered to the laboratory attendant a few hours after he was bitten, the remedy being given in the interscapular region near the medium line.

Two days later the patient complained of slight chilliness and pain in both axillæ. Examination showed a normal temperature but an acutely sensitive gland somewhat larger than a pigeon's egg in each axilla.

These symptoms are the rule after the administration of Yersin's serum. The patient desired to continue at his regular duties and was allowed to do so. No further symptoms developed and the buboes disappeared rapidly.

Attendants had been previously instructed to apply bichloride at once and avoid scratching in case they were bitten. These measures were carried out exactly in this case; but whether this accounts for the failure of the patient to develop plague or whether the protection was due to Yersin's serum it is impossible to say.

*Cholera at Honolulu—Outgoing quarantine in force—Quarantine officers on Pacific coast notified.*

Passed Assistant Surgeon Ramus reports:

December 21. An Hawaiian stevedore died of cholera to-day. Have wired Oakley, Port Townsend quarantine, and Hobdy, San Francisco quarantine. Have put on outgoing quarantine.

December 23. The case of cholera is a stevedore, River Street; native of Honolulu. He worked December 13, 14, and 15 sorting fruit on the Oceanic wharf for the steamship *Alameda*; December 16 worked with the cargo of an island steamship. His whereabouts December 17 and 18 unknown. He was seen drunk December 19. The immediate source of infection is unknown. The ultimate source is probably Yokohama. The patient sickened December 19 at 11 p. m. He was seen December 20 at 8 p. m. by Currie and Brinckerhoff, also by city bacteriologist and by several local men familiar with the disease; regarded by all present as a typical clinical picture of cholera; died December 21 a. m. Necropsy showed nothing else to account for death. Microscopical examination showed majority of intestinal flora to be typical spirilla. Cultural work is being carried on by Currie, but he fears that the organism is dead. The

local board acted promptly. The district is quarantined under police guard. About 70 contacts have been isolated. Bathing and fishing are prohibited in the river and harbor and at the adjacent beach. Interisland vessels are being inspected and stevedores are under surveillance. The Service is enforcing all regulations relating to vessels leaving ports infected with cholera.

December 23. The following telegram was sent to Surgeon Brooks, Los Angeles, Cal., and to the quarantine officers at Angel Island, San Diego, and Eureka, Cal., Port Townsend, Wash., and Astoria, Oreg.:

“Ramus cables one death, cholera, Honolulu, a stevedore. Exercise all possible precautions. See quarantine regulations, paragraphs 90 to 101, and enforce, especially 97 and 101.”

[NOTE.—The paragraphs referred to are the special regulations on account of cholera.]

#### INDIA.

#### *Reports from Calcutta—Transactions of Service—Cholera, plague, and smallpox—Plague in Bengal and India.*

Acting Assistant Surgeon Eakins reports, November 14 and 21:

Week ended November 9. Bill of health was issued to the steamship *Matoppo*, bound for Boston and New York with a total crew of 47, and to the steamship *Rauenfels*, bound for Boston and New York with a total crew of 63. The usual precautions were taken, the holds fumigated, rat guards on the wharf lines, and Asiatics' effects disinfected.

Week ended November 16. Bill of health issued to the steamship *Swazi* bound for Newport News and New York with a total crew of 55. The usual precautions were taken, the holds fumigated, rat guards placed on the wharf lines, and Lascars' effects disinfected.

During the week ended November 2 there were 70 deaths from cholera, 3 deaths from smallpox, and 12 deaths from plague. In Bengal there were 77 cases of plague, with 50 deaths. In India during the same period there were 10,945 cases of plague, with 7,982 deaths.

During the week ended November 9 there were 83 deaths from cholera and 12 deaths from plague. In Bengal there were 32 cases of plague, with 27 deaths. In India during the same period there were 6,821 cases of plague, with 5,228 deaths.

## ITALY.

*Report from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.*

Acting Assistant Surgeon Buonocore reports, December 2:

*Vessels inspected at Naples and Palermo week ended November 30.*

## JAPAN.

*Reports from Yokohama—Inspection of vessels—Status of cholera—Summary of cholera in Japan during present outbreak—Plague and plague rats at Osaka—Outbreak of epidemic plague on the Goto Islands, Nagasaki ken.*

Passed Assistant Surgeon Cumming reports, November 27:

Week ended November 23. Bills of health were issued to 3 vessels, having an aggregate personnel of 236 crew and 396 passengers.

All steerage and crew taken on here, 76 in number, were bathed and their effects disinfected as usual, and steerage coming from or through infected districts were held here for observation five days.

There were no cases of cholera in this city during the week, but 5 cases were reported at Honmoku, a small fishing village about 2 miles below here. Cases are reported every day at Tokyo and from the rural neighborhoods of Chiba ken.

Plague continues severe at Osaka and the whole city is said to be infected.

A severe and fatal epidemic of plague is reported from the Goto Islands in Nagasaki ken, about 60 miles from the city.

Cholera has infected 2 torpedo-boat destroyers lying at Shinagawa, between here and Tokyo.

The sanitary bureau of the home department reports cholera as having occurred in the Empire during the present outbreak, as follows:

Name of ken (prefecture).	Cases.	Deaths.	Name of ken (prefecture).	Cases.	Deaths.
Fukuoka.....	953	641	Ohita.....	35	23
Hyogo.....	564	392	Tokushima.....	27	22
Osaka.....	317	220	Hiroshima.....	21	15
Yamaguchi.....	216	133	Kumamoto.....	18	11
Nagasaki.....	155	95	Ehime.....	16	12
Chiba.....	107	70	Kagawa.....	9	7
Tokyo.....	88	63	Okayama.....	9	5
Saga.....	66	55	Shimane.....	7	7
Kanagawa.....	58	51	Kyoto-fu.....	2	0
Kagoshima.....	49	27	Ibaraki.....	1	0
Wakayama.....	40	24			

Over 20 per cent of the rats examined in one district of Osaka are plague infected.

*Emigrants recommended for rejection.*

Number of emigrants per steamship *Siberia* recommended, November 27, for rejection: For San Francisco 1, for Honolulu 3. Advised to wait: For San Francisco 1, for Honolulu 18.

Per steamship *Shinano Maru*, November 27: For Seattle 6. Advised to wait, 18.

*Report from Kobe—Inspection of vessels—Examination of emigrants—Summary of cholera in Kobe—Smallpox—Plague and plague measures at Osaka.*

Sanitary Inspector Slade reports, November 21:

Week ended November 16: One original and 4 supplemental bills of health granted to 5 steamships with an aggregate personnel of 840. There were inspected 5 vessels, 482 members of crews, and 335 steerage passengers. Manifests were viséed for 21,311 pieces of freight.

There were disinfected 883 pieces of personal effects. Two hundred and fifty-two steerage passengers were bathed and held five days under observation prior to embarkation. Their effects were disinfected.

Emigrants were examined as follows: Steamship *America Maru*, for Honolulu, examined 349, recommended for rejection 136, canceled 4, passed 209; and for San Francisco, examined and passed 1.

The emigrants passed, together with 42 intending passengers to Victoria, per steamship *Oanfa*, were held five days under observation prior to embarkation and their effects disinfected.

The following communicable diseases were reported in Kobe during the week: Cholera, 4 cases, 1 death; smallpox, 7 cases, no deaths. The total mortality was 144.

To November 17, 472 cases of cholera had been reported in Kobe since the first outbreak. Of this number 135 cases recovered, 332 proved fatal, and 5 patients are still under treatment at the quarantine hospital. Fifteen cases are now under medical observation at the isolated quarters at Higashidemachi Hyogo.

The smallpox cases reported in Kobe from the first appearance of the disease to November 17 were 55, of which 20 recovered, 19 died, and 14 were still under treatment at the hospital.

Reports from Osaka for the week ended November 16 show 51 cases and 47 deaths from plague. This disease has been making rapid progress in Osaka during the last few weeks—an increase of 10 cases a week. The Osaka city authorities have decided to carry out disinfection operations on a very large scale in the infected quarters of the city. About 300 persons will be engaged in this work and 10,150 houses will be cleansed and disinfected.

*Reports from Nagasaki—Cholera and plague in Nagasaki ken.*

Sanitary Inspector Bowie reports November 20:

The latest official reports show that plague has reappeared in the prefecture of Nagasaki at the village of Taira Mura, about 60 miles distant from this port. To November 19 there had been 22 cases, with 11 deaths. Cholera also continues to spread at the naval port of Saseho in this prefecture, 40 miles distant.

*Emigrants recommended for rejection.*

Doctor Bowie further reports:

November 20. Number of emigrants per steamship *Siberia* recommended for rejection, 16.

PERU.

*Report from Callao—Inspection and fumigation of vessels—Status of plague in Peru—Plague and smallpox in Chilean ports.*

Assistant Surgeon Wightman reports, November 26:

Week ended November 23. Vessels dispatched as follows: November 18, the German steamship *Itauri*, for San Francisco, Cal., with a general cargo and a total personnel of 147, of whom 1 member of the crew, 32 cabin and 7 steerage passengers were from this port; the American schooner *H. K. Hall*, for Newcastle, New South Wales, ultimately for San Francisco, in ballast, with a crew of 15.

November 22, the British steamship *Dalhanna*, for New York, with a general cargo and a crew of 57, of whom 1 was from this port.

November 23, the British steamship *Chile*, for Ancon, Canal Zone, with a general cargo and a total personnel of 232, of whom 10 members of the crew, 87 cabin and 36 steerage passengers were from this

port. The schooner *H. K. Hall*, being bound for an Australian port, was allowed to depart without fumigation, at the option of her captain. The other vessels were fumigated before departure.

The latest report from the Director de Salubridad on plague in Peru is as follows:

Locality.	Cases Nov. 14.	New.	Re- covered.	Died.	Remain- ing Nov. 20.
Lima .....	6	1	0	1	6
Callao .....	4	0	2	0	2
Trujillo .....	4	16	0	8	12
Plura .....	3	0	0	0	3
Paita .....	6	7	1	7	5
San Pedro .....	4	0	1	0	3
Ferrenafe .....	0	1	0	0	1

Smallpox is still present in Lima.

From Chile the following is reported by bills of health: Three cases of plague with 1 death in Caleta Coloso, near Antofagasta, in two weeks ended November 16; 2 cases of plague, with 1 death in Tacna, 40 miles from the port of Arica, in two weeks ended November 21; and smallpox present in Iquique, November 20.

#### PHILIPPINE ISLANDS.

*Reports from Manila—Improvement in cholera situation—Inspection of vessels—Quarantine transactions, October, 1907.*

Chief Quarantine Officer Heiser reports, November 7:

Week ended November 2. *Cholera*.—The week covered by the report shows a most decided improvement in the cholera situation in Manila, only 4 cases, all fatal, being reported, as against 21 cases for the preceding week.

The only cases known to exist outside of the city of Manila were a few cases at Bocaue and Calumpit, localities situated along the line of railroad. The infection in these cases was directly traced to the city of Manila. Prompt isolation was practiced.

Consular bills of health were issued during the week as follows:

October 28, the British steamship *Muncaster Castle*, with 45 crew, en route from Kobe to Boston and New York, was granted a supplemental bill of health. The vessel and personnel were inspected at hour of sailing.

October 28, the British steamship *Oanfa*, with 89 crew and 1 passenger, en route from Glasgow to Seattle, was granted a supplemental bill of health, after the usual inspection of personnel and cargo.

October 31, the Norwegian steamship *Heimdal*, with 30 crew, en route from Saigon to Iloilo, was granted a supplemental bill of health. Inspected immediately prior to sailing.

Week ended November 9. During the week there were 13 cases of cholera, with 14 deaths, reported for the city of Manila.

Consular bills of health were issued as follows:

November 5 the British steamship *Chingtu*, with 70 crew and 44 passengers, en route from Yokohama to Zamboanga, was granted a supplemental bill of health after the usual quarantine inspection.

November 5 the American steamship *Shawmut*, with 143 crew and 37 passengers, was granted a bill of health for Tacoma via Chinese and Japanese ports. All persons on board were inspected at the hour of sailing. The cargo and baggage were inspected and passed.

November 8 the British steamship *St. Egbert*, with 37 members of the crew, en route from New York to Iloilo, was granted a supplemental bill of health after the usual inspection.

*Quarantine transactions of the Service in the Philippine Islands during the month of October, 1907.*

## VENEZUELA.

*Report from La Guaira—Epidemic smallpox at Caracas and La Guaira.*

Consul Moffat reports, under date of December 8, that smallpox is epidemic at Caracas and La Guaira, it being estimated that there are at least 2,000 cases at the former place.

## WEST INDIES.

*Report from Bridgetown, Barbados—No further cases of yellow fever.*

Consul Clare reports, November 26:

No cases of yellow fever have occurred since November 19. Three remaining cases, which are strictly isolated at the quarantine station on Pelican Island. No cases are known to exist on shore, and there are no suspects.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—  
UNTABULATED.

AFRICA—*Orange River Colony, Bloemfontein.*—Month of September, 1907. Estimated population, 12,000. Total number of deaths, 8, including 2 from tuberculosis.

AUSTRIA—*Brünn.*—Month of October, 1907. Estimated population, 95,342. Total number of deaths, 211, including diphtheria 1, enteric fever 1, scarlet fever 2, and 48 from tuberculosis.

BRAZIL—*São Paulo, Santos, and Campinas.*—Week ended October 27, 1907. Estimated population, 300,000. Total number of deaths, 207, including measles 1, enteric fever 3, whooping cough 2, and 16 from tuberculosis.

Week ended November 3, 1907. Total number of deaths, 176, including diphtheria 1, measles 1, plague 1, whooping cough 2, and 15 from tuberculosis.

Week ended November 10, 1907. Total number of deaths, 215, including leprosy 1, measles 1, whooping cough 1, and 14 from tuberculosis.

CANADA—*Niagara Falls*.—Month of November, 1907. Estimated population, 8,500. Total number of deaths, 6.

COSTA RICA—*Limon*.—Month of November, 1907. Estimated population, 8,000. Total number of deaths, 35, including enteric fever 2, and 3 from tuberculosis.

CUBA.—Month of November, 1907. Reports from the 6 provinces, having an aggregate population of 1,572,797, show as follows: Deaths from contagious diseases: Diphtheria 9, beriberi 1, leprosy 4, enteric fever 14, measles 2, scarlet fever 1, yellow fever 11, and 113 from tuberculosis.

FRANCE—*Cherbourg*.—Month of November, 1907. Estimated population, 43,948. Total number of deaths, 77, including diphtheria 1, enteric fever 4, and 14 from tuberculosis.

*Marseille*.—Month of November, 1907. Estimated population, 517,498. Total number of deaths, 818, including diphtheria 5, enteric fever 68, measles 1, scarlet fever 3, smallpox 27, and 85 from tuberculosis.

GIBRALTAR.—Two weeks ended December 1, 1907. Estimated population, 27,385. Total number of deaths, 11.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended November 30, 1907, correspond to an annual rate of 16.5 per 1,000 population, which is estimated at 16,624,458.

*London*.—One thousand five hundred and thirty-one deaths were registered during the week, including measles 34, scarlet fever 13, diphtheria 30, enteric fever 9, whooping cough 9, tuberculosis 206, and 25 from diarrhea. The deaths from all causes correspond to an annual rate of 16.8 per 1,000. In Greater London 2,120 deaths were registered. In the "outer ring" the deaths included 5 from diphtheria, 4 from measles, 1 from scarlet fever, and 7 from whooping cough.

*Ireland*.—The average annual death rate represented by the deaths registered during the week ended November 30, 1907, in the 21 principal town districts of Ireland was 22.3 per 1,000 of the population, which is estimated at 1,117,547. The lowest rate was recorded in Sligo, viz, 4.8, and the highest in Kilkenny, viz, 39.3 per 1,000.

*Scotland*.—The deaths registered in 8 principal towns during the week ended November 30, 1907, correspond to an annual rate of 19.3 per 1,000 of the population, which is estimated at 1,812,171. The highest rate of mortality was recorded in Dundee, viz, 26.1, and the lowest in Paisley, viz, 12.9 per 1,000. The aggregate number of

deaths registered from all causes was 671, including enteric fever 2, measles 43, scarlet fever 2, and 23 from whooping cough.

ITALY—*Genoa*.—Month of October, 1907. Estimated population, 273,011. Total number of deaths, 574, including enteric fever 12, diphtheria 1, scarlet fever 1, and 50 from tuberculosis.

JAMAICA—*Kingston*.—Month of November, 1907. Estimated population, 52,065. Total number of deaths, 163, including enteric fever 11, and 20 from phthisis pulmonalis.

JAPAN—*Formosa*.—Two weeks ended November 16, 1907. Estimated population, 3,050,004. Total number of deaths not reported. One death from enteric fever reported.

MALTA.—Two weeks ended November 23, 1907. Estimated population, 206,689. Total number of deaths, 184, including diphtheria 3, enteric fever 5, measles 2, and 1 from smallpox.

SPAIN—*Barcelona*.—Ten days ended November 30, 1907. Estimated population, 600,000. Total number of deaths, 349, including diphtheria 6, enteric fever 18, measles 1, smallpox 1, and 36 from tuberculosis.

SWITZERLAND.—Week ended November 9, 1907. Reports from 18 cities, having an aggregate population of 868,928, show as follows: Total number of deaths, 239, including whooping cough 2, enteric fever 2, diphtheria 3, measles 1, and 41 from tuberculosis.

WEST INDIES—*Curaçao*.—Two weeks ended December 6, 1907. Estimated population, 31,600. Total number of deaths, 13. No deaths from contagious diseases reported.

*St. Christopher*.—Two weeks ended November 30, 1907. Estimated population, 49,289. Total number of deaths, 40.

*Cholera, yellow fever, plague, and smallpox from June 28 to December 27, 1907.*

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State and from other sources.]

For reports received from December 28, 1906, to June 28, 1907, see PUBLIC HEALTH REPORTS for June 28, 1907.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
